“The Sound of the Fishermen”

Spring 2006

VOLUME 9, ISSUE 2

FISHERIES SUPPORT CENTER UPDATE

Construction is finally around the corner for Phase I Fisheries Support Center projects in Hooper Bay, Kongiganak, Kwigillinok and Toksook Bay. Materials are being loaded in Seattle for arrival in Bethel on the first barge in late May.

Completed Fisheries Support Center

Paug Vik Development Corporation (PVDC), contractor's for Scammon Bay and Eek FSC's, is the general contractor for construction of the planned FSC's. PVDC and CVRF staff visited all Phase I and Phase II sites and discussed employment opportunities for local hires. If local hire is not available in a particular community, PVDC will hire from within the region. As part of our agreement with PVDC, they are to utilize at least 50% local hire from our communities and/or region when available.

We are nearing substantial completion of Phase I, which is scheduled in mid-August. Materials will be delivered to Phase II communities of Cheforanak, Mekoryuk, Nightmute and Tununak. Depending on fall weather, these FSC's will be completed mid to late November.

Paug Vik Conducting FSC Site Survey in Cheforanak

Designs are being finalized for the communities of Chevak, Napakiak, Napaskiak, Goodnews Bay, Kipnuak, Oscarville, Quinhagak, and Tuntutuliak.

Site selection will start in mid-June and proceed through September. This will include soil testing, surveying, staking, and platting.

Due to the success this year in multiple FSC construction and reducing costs, we will once again implement a staged concurrent construction process. However, this time we will begin with construction for all eight sites as the final phase, further controlling costs, and expediting the construction process. Phase III begins May 2007 and will move as the pace allows until all sites are completed around late fall.

Growing from two to ten Fishery Support Centers this year and with eight more in 2007 takes an extraordinary amount of leadership and expertise to manage the oversight of the programs.

CDQ Project Fund

Who: CVRF City and Tribal Organizations

What: CVRF provides funding for Fisheries, Non-Fisheries, Community Development, and Other Projects for CVRF communities

When: All Year

Where: CVRF Communities

Why: Serve as an economic resource to CVRF communities

Background: The CDQ Project Fund was created to assist with funding community development projects and/or to serve as matching funds for grants. The award to each organization can be for 1, 2, or 3 year projects. Funding amounts have been determined for the next three years, with the amount each year increasing. Each village is allowed at least \$5,000. Additional funding is based on the total population of the community. Contact your local CVRF office or the Anchorage office for details.

Technical Assistance: CVRF offers technical assistance to ensure that all applications are complete. Contact your local office or the Anchorage office for any assistance, questions, and/or suggestions.

CVRF Board Update

The Coastal Villages Region Fund Board of Directors saw some changes during the first quarter of 2006. The following communities had changes in board members:

- Goodnews Bay - Evan S. Evan replaced Jack Stewart
- Scammon Bay - Sebastian Kasayuli replaced George Smith
- Executive Committee Secretary - John O. Mark replaced George Smith

The Board of Directors have a work session scheduled during the first week of May in Fairbanks. During the work session, along with executive staff, the board will be preparing for the upcoming fishing seasons and learning about strategic planning for the region.

Oscar Evon and Morgen Crow

During the first quarter, there were Executive Committee Meetings on January 12th, and 31st. The January 12th meeting was conducted in Scammon Bay, along with loan committee and scholarship committee meetings to approve applications. The loan committee approved eleven applications totaling \$118,750. The scholarship committee approved 33 applications totaling \$100,100 for the spring semester.

At the January 31st meeting, the committee approved an additional investment in American Seafoods, and also approved a \$800,000 expenditure for the Kelly May for repairs.

There was a full board meeting on March 6-7, in Bethel. Joe Hall, fisheries manager, requested the Board's approval for a new 50-ton crane, design, and construction of a halibut boat, and two barges. The Board approved the purchase of the crane, barges, and design and construction of the halibut boat.

Board Orientation at the Yupiit Piciryarat Heritage Center in Bethel

Fisheries Reports

Herring Update

The 2006 herring season is scheduled to begin early in May in Goodnews Bay, and then work its way up along the coast to the Cape Avinof, Nelson Island, and finally into Cape Romanzof District. Coastal Villages Seafoods (CVS) is contracting with Norquest Seafoods to provide a herring tender in each district.

Norman and Carl Anaver

CVS is providing the same bonus program used in past seasons. At the end of the season, CVS will calculate the average roe percentage of the total season catch for each fisherman and then calculate the bonus for each fisherman. A bonus will be paid to fishermen who have caught roe at an overall average of at least 10%. The higher the percentage of roe, the more the bonus payment will be. There have been instances where the CVS bonus is more than what Norquest paid for the catch.

The herring fishery has seen a steady decline in the Harvest Guidelines (amount of allowable harvest) for each district. This did not affect the Goodnews Bay and Cape Romanzof districts where only a fraction of the harvest guidelines are caught. However, the Cape Avinof and Nelson Island districts were affected immensely. In 2005 only 149 of the 507 tons were caught in Cape Avinof. However for 2006, the guidelines have been reduced to a mere 105 tons. The Nelson Island district, where approximately 100% of the harvest guidelines have been caught in the past, has now dropped from 688 tons in 2005 to 562 tons allowed for 2006.

These guidelines may change based on the Alaska Department of Fish and Games Kuskokwim Herring Outlook news release for 2006 which states it is possible that if the biomass is more than projected there may be an increase in the harvest guidelines. However, if the biomass is less than projected, than the guidelines may be reduced. Aerial surveys and commercial catch throughout the season will help determine if there is an increase or decrease of the guidelines.

CVS has invested heavily into the herring fishery to provide region residents an avenue for income. Over the years, herring fishing has declined due to low prices for herring and the increasing cost of gear, supplies, and fuel. Although the fishery has seen a drop in participation and a reduction in the harvest guidelines, there is still opportunity for fishermen to make money. With bigger nets and higher roe percentage, fishermen can take advantage of the CVS bonus program and possibly double their fishing income.

Halibut

The halibut plant manager meeting was held April 13-14 in Bethel. The plant managers reviewed the policies and procedures during the meeting to prepare for the upcoming season. The six halibut plant managers began de-winterizing the halibut plants, calling for supplies, buying fuel oil to heat the plants, turning on electricity, phones, water & sewer, internet, accessing email, and much more. The halibut season is June 1 - July 31 (or until halibut buying slows down). It is estimated that the F/V EIDER will be arriving at South Nunivak on May 29 to tender halibut from CVRF fisherman.

Salmon

Key staff in Quinhagak and Bethel "Buy & Fly" will arrive around May 1 to start preparing for operating this summer. Ice machines for the salmon season will be operational onshore in Goodnews Bay, Eek, and Tuntutuliak. An ice machine will be available on a barge in Napakiak. Openings for the season are scheduled to begin June 15 in Quinhagak, June 23 in Bethel, and June 28 in Goodnews Bay.

Donald Kramer, seafood technology specialist for the Marine Advisory Program, will be in Quinhagak May 23-26, courtesy of CVS, to conduct the Hazard Analysis Critical Control Point (HACCP) training. This training has been conducted for the past three years.

Jim Sartelle is the new salmon operations manager for Quinhagak. Jim started with CVS in 2002 as production manager and soon after took up permanent residence in Quinhagak. Jim has 12 years of salmon processing experience working in the Quinhagak Plant, the old BNC Salmon Plant in Bethel, and in Bristol Bay.

Perry Hendericks is the new Bethel "Buy and Fly" salmon operations manager. Perry has been working in the fishing business since 1967. He started out storing halibut in cold storage in Seattle and eventually worked his way up to Alaska. Perry worked in Bethel for Inlet Salmon as the plant superintendent until it closed in 2000. Afterwards, he was still employed with Inlet Salmon and eventually moved to CVS in 2005.

F/V KELLY MAE

Kevin Kennedy, vessel manager, is overseeing Dave Yansen, Joe Eisenman, Tyrrel Aloralrea, Herbert Roberts, and Brendon Abruska on the upgrades, repairs, and painting of the F/V KELLY MAE in Seattle. The engines and generators have been upgraded; the bottom, props, and shaft have been repaired; and a new paint job is also in the works.

The F/V KELLY MAE will show up in Quinhagak mid-May. Dave Yansen is the captain.

Morgen Crow, executive director, and Joe Hall, fisheries manager, visited the F/V KELLY MAE while on a trip to Seattle in March. On April 20, Joe traveled to Seattle to check the progress of the repairs and upgrades.

Joe Hall, Morgen Crow with CVRF, and Roger Mjeltevik, Inge Andreassen with American Seafoods visiting the F/V KELLY MAE in Seattle

Program Updates/Announcements

CDQ Project Fund

We are pleased to have the new CDQ Project Fund available for our member communities. Each of our member communities received a letter from Oscar Evon, CVRF Board President, in December. We are available to help with the application process for this and other CVRF programs. Currently, funds are still available for most of our member communities. We are focused on fisheries-related economic development projects, and we prefer projects related to our local fisheries. However, ANY project that has an overall economic benefit to the community will be considered. A good idea for these funds is for matching funds for grant applications.

The Native Village of Tununak was the first community to have a CDQ Project Fund request approved on March 31, 2006. With the funds provided, they are going to implement the Spring Youth Project. This fisheries and youth related project will pay for recently graduated community members to clean up debris around the local fish pits on the beach. Due to recent storms, the beach is in need of cleaning to prepare for the subsistence and commercial fishing seasons. Look for an update of this project in the next newsletter.

If you would like to request funds for a community project, please complete the request form or send in a detailed request letter. For guidelines, a request form or if you have questions please contact RONALDA OLIVERA at 1-888-795-5151 or e-mail ronalda_o@coastalvillages.org.

Human Resources Update - We are still Growing!!!

We welcome Denise LaFever as the new chief financial officer at our Anchorage office. Denise will be starting on June 1. She is a Certified Public Accountant who has previously worked as a financial manager/controller for an Arctic Slope Regional Corporation subsidiary.

We also welcome Larry Warner as the fisheries accountant to our Anchorage office. Larry will be starting on May 1. He has previously worked for a local telecommunications company as a plant accountant.

We also welcome Mae Hank as the program administrator to our Anchorage office. Mae will be starting on May 1.

We welcome Chad Wikheim as the new expeditor at the Anchorage office. He was a medset driver before coming onboard with CVRF.

Congratulations to Darla Graham! She has been promoted to receptionist/purchasing clerk and has taken additional responsibilities of processing purchase orders for Anchorage and the community offices.

Congratulations to Gretchen Williams! She has now joined the program department as the program assistant at the Anchorage office. Gretchen was previously the accounts payable clerk for accounting.

Congratulations to Dawson Hoover! He has been promoted to the outreach coordinator, and has taken over the responsibilities of the newsletters, annual reports, advertisements, and other outreach duties.

Congratulations to George Smith of Scammon Bay! He has been promoted to fisheries support center superintendent. He has taken the duty of overseeing all FSC operations in the CVRF villages.

Tax & Permit Assistance Program

The 2006 Alaska Business Development Center's Volunteer Tax and Loan Program offered free income tax preparation assistance in our 20 member communities in February and March. CVRF continues to sponsor this program to assist our members in completing their tax returns. This year's program has resulted in \$2,069,243 in tax refunds to region residents, assisting a total of 3,742 people with their taxes.

4-SITE - Scholarships, Internships, Training, Employment

Scholarships – Scholarships are available to CVRF residents. The office is currently accepting applications and the deadline to apply is May 31, 2006 for the Fall 2006 semester. Scholarships can be used for college, vocational training, and GED classes.

Internships – There are three internships available: Safety Intern, Administrative Intern, and the Project Intern. At the present, there are no interns. Interested parties may apply through their local CVRF office or the Anchorage office.

Training – CVRF is working with finalizing an MOU/MOA with Paug Vik Development Corporation for the apprenticeship opportunities on the construction of the eight fisheries support centers planned for the year. If you are interested in this opportunity contact the Anchorage office.

Employment – CVRF is currently recruiting for new community liaisons for the communities of Nightmute, Napaskiak, Oscarville, Newtok, and Tununak (Community Liaison Aide). We are also recruiting for all CVS plants for the upcoming season.

Youth Leadership - Youth groups had their regular meetings during the quarter and are preparing for various activities. If you are between the ages of 14 and 24, and are interested in participating in the Coastal Villages youth leadership program, please contact your local CVRF office or the Anchorage office.

CVRF Residents at Westward Seafoods in Dutch Harbor

Michael Lake checking on John Joe in Dutch Harbor

Outreach - The Chevak High School Boat Building Project received funds from CVRF to purchase items for welding boats. Michael Lake, Lloyd Black and Dawson Hoover traveled to Dutch Harbor from February 27-March 2 to meet with residents working on-shore and off-shore. Jenny Koenig traveled to Bethel on March 8 to attend the YK Delta Career Fair. The community liaisons traveled throughout the villages for recruitment. Look for us in your community!

Loan Program – The next deadline to apply is October 31, 2006. If you have any questions about the loan program, please contact your local CVRF office or the Anchorage office at 1-888-795-5151.

Napaskiak HS Girls Team

Scammon Bay HS Girls Team

Kwigillingok HS Boys Team

Congratulations to the Napaskiak High School Girls Basketball Team, Scammon Bay High School Girls Basketball Team, and Kwigillingok High School Boys Basketball Team for making it to the 1A State Basketball Tournament in March! Your hard work and teamwork paid off!

Marine Safety Instructors Training in Seward - March 13-20

Michael Lake, project assistant, and Clifford Paniyak, Chevak community liaison, recently completed a one-week Marine Safety Instructors Training (MSIT) in Seward on March 13 to 20. This training was conducted by marine safety trainers from the Alaska Marine Safety Education Association (AMSEA) and held at the Alaska Vocational Technical Center. They are now Certified Marine Safety Instructors. Throughout the week they were trained in the following areas: cold water survival with learning how to don and maintain survival suits in and out of the water, training in launching life rafts, firefighting, use of pumps, activating Emergency Position Indicating Radio Beacons (EPIRBs), types of personal floatation devices and use of a VHF radio to transmit MAYDAY messages in a distressed situation. On the last day they had to spend a night in a remote location with just the clothing they had on and items in their pockets. It was said to be one of the longest and coldest nights that the AMSEA participants had encountered for one of these trainings.

In order to receive their certification, these staffers had to conduct a one-day training exercises in our communities. Mike implemented the training in Quinhagak for eight participants and Clifford led the training in Toksook Bay which was attended by twenty-two residents. It was an experience that they will never forget. Community members who participated received hands on experience with the survival suits, flares, played roles in distressed situations. They gained an overview of the same equipment and techniques that our staffers were trained in by AMSEA. They also learned the seven steps of survival: Recognition, Inventory, Shelter, Signal, Water, Food, and Play.

CVRF now has three Marine Safety Instructors on staff and that number is expected to grow. Last winter, all of the CVRF community liaisons were trained in the basics of marine safety and we expect some to attend the next instructor's course when it is held in the fall. CVRF intends to extend this knowledge to all of our members who work and travel on the water in the hope that life in our villages will be safer for those who live in the region.

CVRF Supports Sockeye Research on Kuskokwim

Sockeye salmon is an important fish to the culture and economy of the Kuskokwim River area. There is a growing interest in commercial harvest, but little is known about the biology and ecology of sockeye salmon in the Kuskokwim River. Since little is known about the ecology and habits of this fish in our region, the State, by law, must set very low allowable harvests. Nonetheless, there are both fishermen and biologists who believe that more fish could be harvested on a sustainable basis if sound scientific research can support this.

In response to this, CVRF committed \$40,000 to fund a pilot study in 2005 that allowed the Alaska Department of Fish and Game (ADF&G) to collect preliminary information on the distribution and habits of Kuskokwim sockeye. It also allowed commercial fisheries biologists to test equipment and methods that could be used for a larger study. Radio tags were placed in live fish to allow researchers to track a number of fish to their destinations. Tracking equipment included boats, aircraft and satellites.

Sara Gilk, research biologist for ADF&G taking measurements

It is generally believed that sockeye salmon spend a significant amount of their life cycle in lakes. Results from the CVRF – ADF&G 2005 pilot project were surprising because they suggested that many sockeye in the Kuskokwim River drainage return to rivers with no connection to lake habitat. Typically, newly-hatched sockeye salmon spend one year in lake habitats before migrating to sea (referred to as “lake-type” sockeye). In some cases, however, young sockeye salmon migrate directly to sea after hatching (“sea-type” sockeye). In more rare cases, the fish spend one year in river habitats before migrating to the sea (“river-type” sockeye). Commercial catch sampling conducted since 1984 showed that about 80 percent of Kuskokwim River sockeye salmon spent one year in freshwater before migrating to sea. It was assumed, however, that this winter was spent in a lake. Since half of the radio-tagged sockeye salmon in 2005 returned to the Holitna River system, a river drainage not associated with any large lakes, many of the sockeye returning to the Kuskokwim River drainage are believed to be river-type sockeye. These interesting results made it into the scientific literature and attracted attention among

fisheries researchers. Scientific interest in studying the growth and habitat use of river-type versus lake-type sockeye in the Kuskokwim drainage has been proposed. Proposals for an expanded multi-year research study were written and submitted this past winter.

We are pleased to announce that based on the CVRF funded pilot study of 2005, the Arctic-Yukon Sustainable Salmon Initiative (AYKSSI) has provided \$470,000 to conduct a two-year study which will begin this spring. This study will be implemented by the ADF&G Commercial Fisheries Division.

Working on a Sockeye

Interest in this study has reached US Government agencies as well. The US Fish and Wildlife Service is looking at ways to complement this study. In addition, the US Park Service in Lake Clark National Park will commit additional funds to study the Sockeye that work their way up the Kuskokwim and into the Park itself.

This information will serve as a foundation for future research, and will be used for sustainable management of Kuskokwim River sockeye salmon. We believe that this research will allow the State to increase the commercial harvests of sockeye on the Kuskokwim which will benefit CVRF member communities.

FSC Update Continued from PG 1

We take this opportunity to welcome George Smith from Scammon Bay as the newest member of our FSC project management team. Each site's day-to-day operations and facility maintenance is still managed by the local welder/mechanic: George is responsible for operations management to assure each FSC provides its intended level of service to the community. George will also remain as the Scammon Bay FSC mechanic/welder as he takes on this new role.

George will be assisting communities develop their own unique business plan. He has many great ideas of helping make sure each of our facilities remain sustainable and support our fisherman for years to come. As one community member calls it, “leaving no fisherman behind.”

Corrections: An error was made in the previous issue. William Igkurak (not Igurak) is from Kwigillingok (not Kipnuk). We sincerely apologize for this mistake.

Louis Bunyan Memorial Scholarship (LBMS)

Fall 2006 Semester Application Deadline:

May 31, 2006

QUALIFYING FOR THE PROGRAM

Eligibility is based solely on the following conditions. Qualified candidates must have:

- 1) Resided in one of the Coastal Villages member communities for a minimum of 5 consecutive years, and be a bona fide Alaska resident;
- 2) Been accepted into a relevant program of study at an approved/accredited institution, preferably for an Associates degree, Bachelors degree, technical, or vocational certification/licensing program.
- 3) Exhibited strong academic skills, or strong work performance, and be committed to completing their proposed program of study

APPLYING FOR THE PROGRAM

To be considered for a scholarship award, candidates must submit the following:

A completed scholarship application, written essay, copy of high school/college or GED diploma or/ most recent college transcript(s), copy of enrollment certification letter from accredited institution, two letters of reference from teachers/employers/elders (must be non-family members), and proof of CVRF member community residency if living outside of the CVRF region

For more information or for an application, please contact your local CVRF office, or call 1-888-795-5151. You may also visit us at our website: www.coastalvillages.org

711 H Street, Suite 200, Anchorage, Alaska 99501

CVRF is now recruiting for Internship Positions at the Anchorage office

Each internship lasts 3 months, and transportation to Anchorage is provided. Room and board is optional. The following general qualifications apply:

- Resided in one of the Coastal Villages communities, and be a bona fide Alaska resident.
- The internship position requires advanced education and/or work experience. He/she must have completed at least two years of post-secondary education course of study, preferably an Associates degree, Bachelors degree, or technical or vocational skill certification and/or licensing program or three years general work experience in business administrative fields.
- Consider working in the fisheries industry of the Yukon-Kuskokwim Delta region in western Alaska at some point following the completion of their internship period(s).

Accounting Intern

- Must be interested in a career in the accounting field
- Computer, analytical, organizational, and communication skills
- Willing to learn different accounting areas (accounts payable, purchasing, etc...)

Project Intern

- Must be interested in community development issues in rural Alaska
- Ability to collect and organize data
- Communication and people skills (written, face-to-face, and over the phone)
- Computer skills (Word, Excel, Access) and communication skills

Safety Intern

- Must be interested in a career in the Safety field
- Opportunity to attend the University of Alaska for a two-year safety program
- Complete their Bachelor's Degree at the University of Washington
